Hawkins leads the industry with their rugged and reliable mounted liquid fertilizer applicator tooled with the unbeatable Hawkins Coulter "N" Forcer. The Double Fold Full Truss Tool Bar (up to 61') is 5-year warranty-strong. Custom construction eliminates bowing when lifting or pulling and allows for unlimited bolt-on capabilities. Trash and ground conditions create little problem for the "N" Forcer. Tests show that the placement of the fertilizer is precise and loss of fertilizer and soil moisture is minimal. The J.D. Skiles "Row-Tracker" fertilizer cart is designed and proven to withstand rugged field conditions and tracks perfectly behind, with it's "All-Wheel Steering" capability.
