# HAWKINS MOUNTED FERTILIZER EQUIPMENT

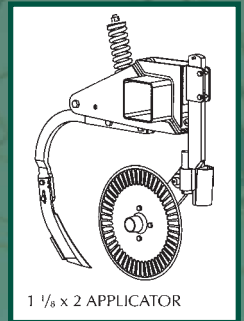

**Heavy Duty Adjustable Nurse Tank Hitch**

1 x 2 APPLICATOR

Hawkins fertilizer equipment comes in either single or double bar, folding or ridged. The double bars are designed with 24 inches between the bars. Folding bars are available in either standard or custom length center sections. Hawkins fertilizer bars can be set up with a 1 1/8" x 2" edge bent heat treated shank, 1" x 2" curved heat treated shank, 1 1/4" x 2" curved heat treated shank, 1" x 3" high tensile steel shank, as well as with a liquid fertilizer injection system (Coulter "N" Forcer). All double bars come ready to accept a nurse tank hitch available in 30", 42", or custom lengths up to 72" lengths.

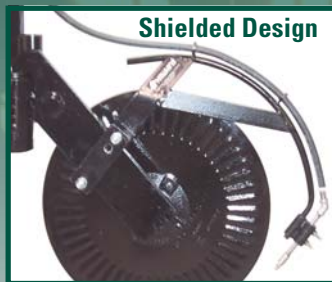

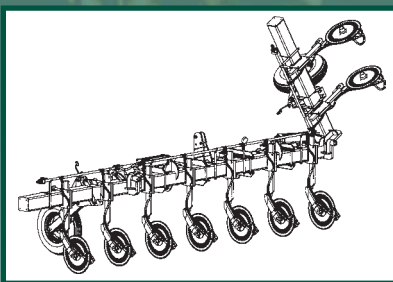

1 1/8 x 2 APPLICATOR

## COULTER "N" FORCER

A Fertilizer System That Performs The Way You Want

### The COULTER "N" FORCER Has These Advantages

- Low Cost
- High Speed
- Accurate
- Low Power
- Adjustable Depth
- Most Any Spacing
- Excels In Trash
- Minimum Cover Disturbance

**Shielded Design**

When used with a fluted coulter and applied under pressure, your fertilizer can be placed to the depth set by the coulter blade. Trash and ground conditions create little problem for the "N" FORCER. Tests have shown that the placement of the fertilizer is precise. Loss of fertilizer and soil moisture due to evaporation is minimal. Ideal for use in standing alfalfa, ridge till and no till crops. The "N" FORCER will attach to most brands of coulters.
