

DOUBLE FOLD TOP TRUSS TOOL BAR

Strong, Custom Construction Eliminates Bowing when Lifting or Pulling, Allowing Unlimited Bolt-On Capabilities

61' Top Truss Folds to 18' 2" Transport Width

THE HAWKINS TOP TRUSS TOOL BAR moves the cylinders and the hinge to the top of the truss which adds strength to the entire tool bar. It also allows implements to be attached at any location on the bar. The top bar is constructed of 5" x 7", 3/8" wall with the bottom bar being 7" x 7", 1/4" wall. The front truss, with weld-on hitch, is 7" x 7", 3/8" wall. A total of 8 degrees of flex, 4 up and 4 down, is available.

Massive Center Section Strength

120 degrees Main Hinge in Up Position with 2 1/4" Greaseable Pin and Adjustable Wing Stop

6" x 30" Prince Cylinders

Greaseable Forward Hinge on the Double Fold Top Truss Bar
